

Improved navigation in Simployer Portal

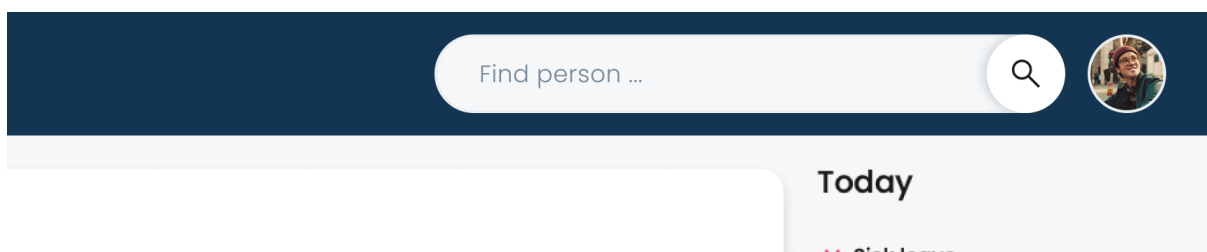

Welcome to the first of two releases that aim to improve the navigation of Simployer Portal. We've tidied up and modernized the navigation, making it a breeze to find what you're after. Say hello to a cleaner, more intuitive experience!

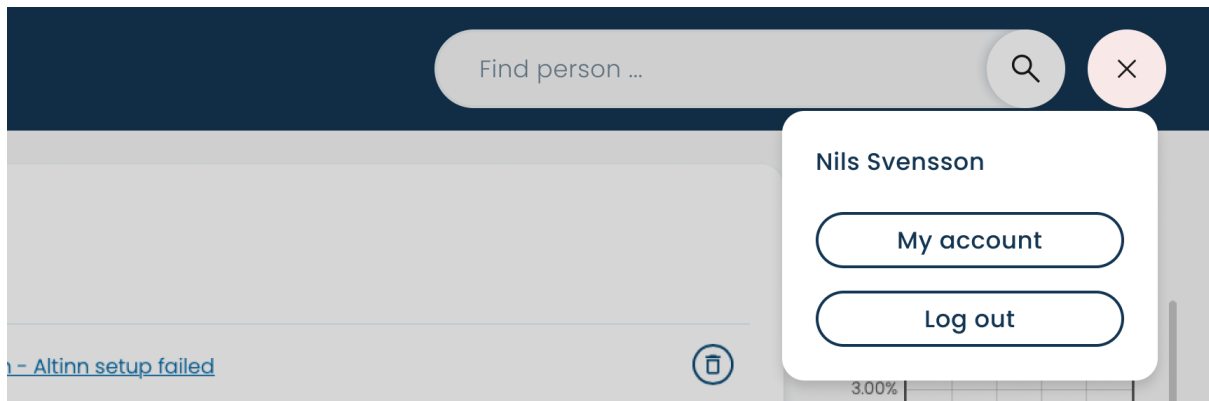

Updated header

In the new header you will find a new product switcher. Use this when you want to go to another product in the Simployer suite.

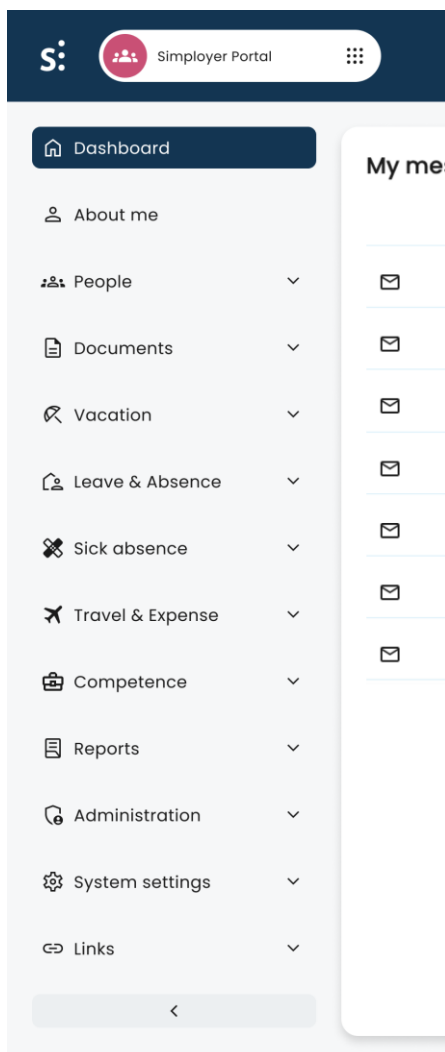

In the header you will also find the search. The search is placed at the same place as before and behaves just as it has done up until now. Right next to the search you will find your user information.

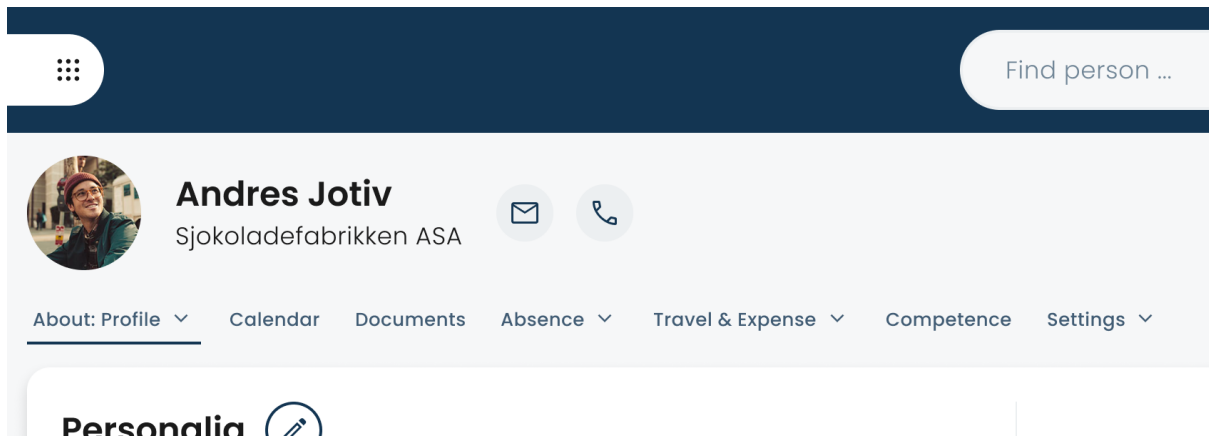

New left menu

The navigation for Simployer Portal has moved to the left side. This menu is always visible. You can minimize the menu to maximize the work space. The menu contains all the menu items needed to navigate through Simployer Portal. Here you will see that we have re-organized the menu items and you will now clearly see the different areas that Simployer Portal consist of.

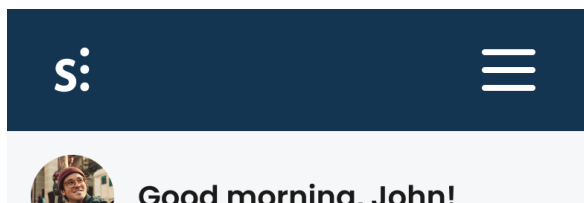

New tab menu

To view detailed information about yourself and your data in different products you can now use this tab menu to navigate between different areas concerning yourself or employees you have access to view. This same way of navigating can also be used on departments and groups.

Improvements on mobile

All these improvements to the navigation also help the mobile experience. We have gathered everything related to navigation and search in a mega menu that's easy to access in the header.

New start page in Simployer Portal

We've created a whole new start page for Simployer Portal. You will find all the information you got on the old start page in addition to some new widgets.

The screenshot shows the Simployer Portal dashboard for user Andres. The interface includes a top navigation bar with the HRM logo, a search bar for finding people, and a user profile picture. A left sidebar contains a navigation menu with categories like 'About me', 'People', 'Documents', 'Vacation', 'Leave & Absence', 'Sick absence', 'Travel & Expense', 'Reports', 'Administration', 'System settings', and 'Links'. The main content area is titled 'Good morning, Andres!' and features several widgets: 'Popular shortcuts' with icons for My info, My documents, My vacation, My travel, My business, and People; 'Fun facts' listing vacation days, travel days, sick days, and new colleagues; 'Your colleagues' showing Johnny, Anna, and Beathe with their absence periods; 'Sick leave' with a line chart showing percentages for different departments from January to May; and 'Your messages' displaying a list of 'Upcoming tasks' with dates and a pagination bar at the bottom.

Popular shortcuts

- My info
- My documents
- My vacation
- My travel
- My business
- People

Fun facts

- It's **45 days** until your next vacation day.
- You have traveled for **8 days** this year.
- It's been **109 days** since your last sick day.
- You have gotten **17 new colleagues** this year.

08.05.2023	Upcoming tasks
07.05.2023	Upcoming tasks
06.05.2023	Upcoming tasks
05.05.2023	Upcoming tasks

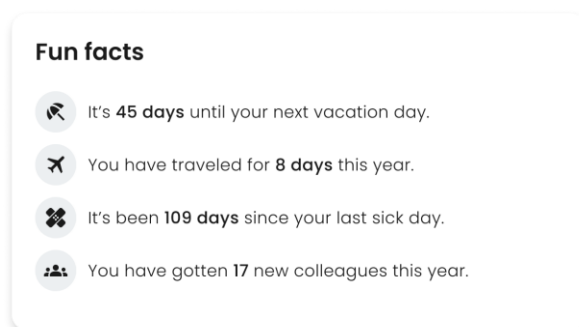

Popular shortcuts

We start of with a new widget that we have called Popular shortcuts. Here you will find most commonly used pages in Simployer Portal. We have gathered them on the start page as shortcuts for your convenience.

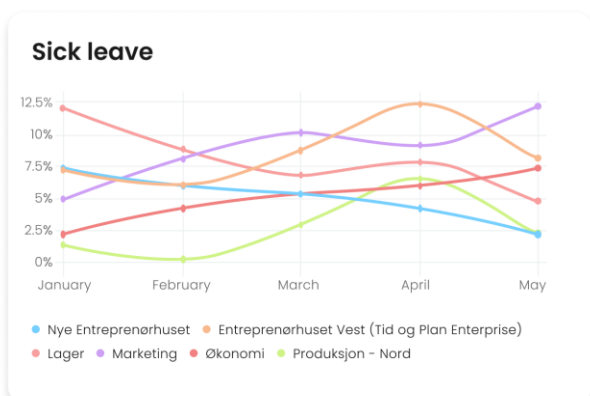

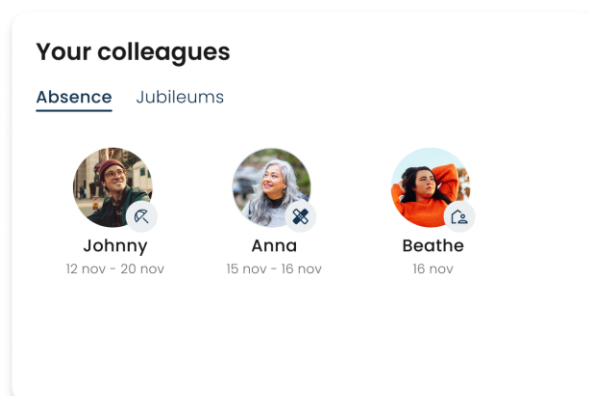

Fun facts

Right next to the shortcuts you will find another new widget we have named Fun facts. These are small pieces of information that could be interesting to you. We will rotate what is shown here, so you should be shown new pieces of facts on each visit.

Your colleagues and sick leave

Next you will find two widgets that we also had on the previous start page, your colleagues and sick leave. It's the same information as before, but it has been given a more modern look and feel.

Your messages

The last widget (for now) Is Your messages. This works the same way as before.

The mobile experience

All these widgets are also available if you visit Simployer Portal on your mobile device. You can scroll down to view all the widgets.

Information regarding the Simployer App

Within December 24, the Simployer App will no longer be available in App store/Google play, but you may still access Simployer thru your smart phone. Simply add a shortcut to the web page to get an icon on your home screen. This new navigation will further improve the user experience on smartphones.

 Good morning, John!
